## New Infrastructure for California's Long-Term Zero Emissions Plan

California's climate plan would increase electricity consumption by as much as 68% by 2045 which would create a tremendous strain on the power grid unless substantial private and public investments are made in clean energy. The State's power grid needs massive investments to attain the clean-energy future outlined in California's five-year climate roadmap. Our other utilities (water, wastewater, gas) are modernizing systems which in turn will require a greater demand for electricity. How will California get to 91% less use of fossil fuels by 2045 to achieve carbon neutrality?

### Distinguished Panel

#### Los Angeles Department of Water & Power

Aram Benyamin, *Chief Operating Officer*

#### Los Angeles Department of Water & Power

Jason Rondou, *Director of Power System Planning*

#### Moderator

Chris Kindle - Brown & Caldwell

**Wednesday, June 7**

**8:00 am**

Check-in / Networking / Breakfast

**8:30 – 10:30 am**

Presentations / Q&A

#### **Holiday Inn**

14299 Firestone Blvd.  
La Mirada, CA 90638

Free Parking

**\$96 / person** until 5/19/23 at noon

**\$129 / person** until 6/2/23 at noon

*All registration after 6/2/23 will only be  
accepted at a rate of \$149 per person  
via the CN Office.*

*Walk-in availability can not be guaranteed.*

**RSVP: [www.construction-network.net](http://www.construction-network.net)**
