All registration after 6/9/23 will only be accepted at a rate of \$149 per person via the CN Office.

The City of Los Angeles has completed the One Water LA 2040 Plan. The Plan is a roadmap, connecting plans, ideas, and people to arrive at better and fiscally-responsible water planning solutions. Collaboration is the foundation of the One Water LA planning process. The Plan identifies projects, programs and policies that will yield sustainable, long-term water supplies for Los Angeles and will provide greater resiliency to drought conditions and climate change.
