Sites Reservoir Project

A \$3.5 Billion Project

Coming Soon to the Sacramento Valley

Sites Reservoir, located below the existing reservoirs in the Sacramento Valley, will increase the resiliency of water supplies since it will not rely on spring snowmelt for filling but instead will capture storm-related runoff and a portion of storm-related flood water. Operating in conjunction with other California reservoirs, Sites Reservoir will substantially increase water supply flexibility, reliability, and resiliency in drier years. Sites Reservoir is the only proposed storage facility in the State of California that will help with statewide operational effectiveness of the State Water Project and Central Valley Project.

The Sites Project Authority will build and operate a climate-resilient, 21st Century water storage system to responsibly manage and deliver water, improve the environment, provide flood control and recreational benefits. Additionally, it will provide affordable water for California's farms and cities for generations to come.

Tuesday, September 26

8:00 am

Check-in / Networking / Breakfast

8:30 – 10:00 am

Presentations / Q&A

Long Beach Marriott
4700 Airport Plaza Drive
Long Beach, CA 90815

Free Parking

\$96 / person until 9/8/23 at noon

\$129 / person until 9/22/23 at noon

All registration after 9/22/23 will only be accepted at a rate of \$149 per person via the CN Office.

Walk-in availability can not be guaranteed.
