\$138 / person until 4/4/25 at noon

*After closing, all registration will be accepted at a
rate of \$160 per person via the CN Office.*

Walk-in availability can not be guaranteed.

This session will present attendees with best practice strategies and provide a deep dive into how to fiscally constrain and resource balance an agency's capital improvement program. Additionally, we will cover how to establish an effective reserve to facilitate legacy projects and the importance of transparency and accountability at each phase. Finally, we will discuss project initiation and completion events and how those can be used to enhance agency credibility.

Learning Objectives — Following this session, participants will be better able to:

- Develop a multi-year capital improvement program with a breakdown of key project phases.
- Understand methodologies to implement fiscal constraint and resource balancing.
- Establish accountability checkpoints and enhance the transparency of a project's progress.
